

# Down The Far Right Rabbit Hole

*Unhumans:*

*The Secret History Of Communist Revolutions (And How to Crush Them)*

Jack Posobiec and Joshua Lisec

New York: War Room Books (Skyhorse Publishing), 2024, h/b, £24

## John Newsinger

One of the co-author's of this book, Jack Posobiec, is a leading member of Donald Trump's social media army. According to an article on *The Atlantic* magazine website, he is actually in the process of stepping into Charlie Kirk's place.<sup>1</sup> He recently accompanied Trump's Treasury Secretary Scott Bessent on a trip to the Ukraine and is reportedly close to 'Secretary of War', Pete Hegseth. As long ago as June 2022, the Southern Poverty Law Center, a US civil rights organisation, published an Extremist File on him, identifying this former US Navy intelligence officer, who served in Guantanamo for ten months in 2012-2013, as an 'internet performer of the anti-democracy far right'. Since 2016, he has been 'arguably the most active spreader of disinformation among all internet performers in the far right social media ecosystem'. Among other conspiracies he had 'pushed the Pizzagate lie'.<sup>2</sup> The File goes on to usefully document his career in some detail, in particular his embrace of 'white nationalism'.<sup>3</sup> What we are concerned with here, however, are his various books, culminating in the best-selling *Unhumans*.

Posobiec published an account of the Trump election campaign and his part in it in 2017: *Citizens For Trump: The Inside Story of the People's Movement To Take Back America*. This was followed in 2018 by *4D Warfare: A Doctrine for a New Generation of Politics*. These two volumes still have some peripheral contact with reality – just – although Posobiec was already desperately trying to

escape from its grip. And then in 2021 he published his *The Antifa: Stories from Inside the Black Bloc*, completely disappearing down the MAGA Rabbit Hole. Here he shows that the anarcho-communist Antifa movement, that is threatening to take control of the United States, was originally founded 'by a Soviet agent and committed Stalinist named Ernst Thalmann in 1932 in Weimar Germany'. He takes the history of this period, the role of Third Period Stalinism in facilitating Hitler's rise to power and Thalmann's own betrayal by Stalin, twisting it into somehow supporting his view of contemporary US politics.

But while Antifa might have been born in Weimar Germany, it was 'nursed' in Mao's China! The Cultural Revolution of the late 1960s and early 1970s provided the model for the attack that is underway on American values, politics and society, with President Obama preparing the way. What he finds particularly worrying is the way that Corporate America has embraced this anti-capitalist movement. Obviously, there is George Soros, 'the notorious Hungarian billionaire', but the situation is even more dire. Nike, for example, has 'proudly made divisive Black Lives Matter activist, [American football player] Colin Kaepernick its public face after his controversial campaign of kneeling during the National Anthem'.

And it gets worse. He singles out the Southern Poverty Law Center, 'which professes to be anti-hate by labelling mainstream conservative organizations and individuals hate groups' and yet still 'receives major funding from the likes of JP Morgan Chase, Apple, Charles Schwab, Verizon, Newman's Own and Kraft Heinz'. As far as Posobiec is concerned, many US corporations are actually using Antifa for their own ends, using them as 'shock troops against real populist movements in the West', supporting them 'both in spirit and financially'. In effect, the CEOs of many corporations are paying Antifa what amounts to 'a blood tax'. And then there are Google, Twitter and Facebook. He is so concerned about the way these corporations are cosying up to Antifa that he insists that 'anti-trust action must be taken against the internet giants, and the FCC [Federal Communications Commission] should regulate them as public utilities'. Remember, this was published in 2021, before Elon Musk bought Twitter and the tech lords rallied to Trump. We won't even mention Ben and Jerry . . . As far as Posobiec was concerned, Corporate America had embraced Antifa and this was despite its 'waging war . . . against democracy itself and especially capitalism'.<sup>4</sup>

In 2024, Posobiec teamed up with Joshua Lisec, a very successful ghost-writer, to write two books, *Unhumans* and then *Bulletproof: The Truth About the Assassination Attempts on Donald Trump*. Let us briefly examine the *Bulletproof* volume. It comes with a Foreword by Donald Trump Jr, something that in itself shows how close Posobiec is to the Trump regime. In this volume, they examine the attempt by 'Democrats and their allies, proxies, cut-outs, and saboteurs' to bring down Donald Trump and in the process eliminate US democracy. What Trump is dealing with is an

oligarchical panopticon<sup>5</sup> that possesses de facto control over the United States federal government, including but not limited to the military-industrial complex, the intelligence community, the political mega-donor class, corporate interests, and the tangled web weaving them all together.

The book sets out to 'investigate' whether or not this oligarchical panopticon was behind the various attempts to assassinate Trump, either by whipping-up hatred or perhaps more directly. Posobiec and Lisec emphasise the scale of the threat that Trump poses to the oligarchical panopticon. As far as they are concerned, he

committed the unpardonable sin of the elite – he became a class traitor. His America-first, working-class values-based message from 2015 onwards has put enmity between him and the establishment news media and political institutions infiltrated by literal communists.

One of Trump's stances that has particularly outraged this establishment is his refusal to entangle 'the United States in new military conflicts'. This was, of course, written before his attack on Iran. They even compare him with that other historic 'class traitor', Jesus Christ!

Most of the book is devoted to examining the assassination attempt at a rally in Pennsylvania 13 July 2024 when Trump had his ear nicked, and three of the people in the audience were also hit, one of them, Corey Comperatore, shot dead. Was this the work of a lone assassin or something more? They identify twelve botches that reflect 'a severe breakdown in standard security protocols, coordinations, and responsiveness' that made the attempt possible. Was this just by chance or was it deliberate? How to evaluate this? They 'ask AI what it thought, ChatGPT 4o specifically'. The response was that it was highly unlikely

---

<sup>5</sup> A panopticon is a circular prison design where a single guard in a central tower can observe all the inmates without the inmates knowing if they are being watched.

that the botches were chance. And if the attempt had been successful, then the likelihood is that the country would have been plunged into civil war with then President Joe Biden putting troops on the streets, and potentially even launching 'drone strikes against conservative Christian influencers calling for justice . . . That was our future. A future one inch away'. As they conclude: 'We must fight to defend our nation, or it will surely perish'.<sup>6</sup>

Which brings us to their best-selling civil war manifesto, *Unhumans*. This volume has a Foreword by Stephen Bannon and carries endorsements from J D Vance, when a US Senator, Tucker Carlson, General Michael Flynn and Donald Trump Jr.. In this volume they reveal that history has been a protracted struggle between the communist unhumans, committed to destroying everything that makes us human, and an embattled humanity that has turned to a succession of strong men for salvation. The unhuman conspiracy is relentlessly laid bare, its methods exposed, and readers are urged to get ready for war. The first strong man they identify as taking up the fight against this communism is Julius Caesar. He saw what was coming and took pre-emptive action, crossing 'the Rubicon with his bros in tow'. Caesar 'restored order and brought glory to a fragile civilization and feckless government. He is why men today think about the Roman empire every day'. Spartacus does not get a mention and one is left wondering whether he was one of their unhumans. Anyway, to be fair, this book is not really about History, it is all about radicalising the politics of the US MAGA Right.

The first Communist revolution they explore in detail is the French Revolution. Obviously, they make clear that the American Revolution was not the work of unhumans; it was about independence, not communism. They also exempt the Irish fight for national independence from any unhuman connection, something that the Protestant landlords would have strongly disagreed with. But in France in the 1790s the unhumans seized control, and it took Napoleon to restore order. Even so the unhumans continued to plague France. Even worse than France, however, was the 1793 revolution in Haiti.

What particularly concerns them, however, are the similarities between eighteenth century France and the contemporary United States. The political unrest in the US in 2020 'was a sort of micro-French and/or Haitian Revolution' even if it 'didn't succeed in overturning the federal system . . . or killing all

white people'. The Black Lives Matter protests, obviously the work of unhumans, did actually see 'many black mobs' hunting for white people to kill and they even identify similarities between Black Lives Matter and Haitian voodoo!

Part of the problem was 'so-called "Diversity, Equity, and Inclusion"', usually referenced as DEI, but ominously sometimes as DIE! As they tell their readers, racial equality 'is not enough, not for the radical left or for the Haitian hate mobs'. They leave their readers to 'sit with the ramifications of the French revolutionary template'. They move on to the Russian Revolution, somehow missing the American Civil War and the crucial question of whether or not Abraham Lincoln was unhuman. Here they identify the Russian White Army leader, Pyotr Wrangel, as humanity's hope for salvation. He had potentially been Russia's Franco but, unfortunately, whereas Franco had the support of Germany and Italy in his fight against the unhumans, Wrangel was let down by the likes of Woodrow Wilson. Among the many things missing from this fantasy history are the anti-Semitic pogroms carried out by the White Armies during the Russian Civil War, in which perhaps as many as 250,000 Jewish men, women and children were killed, and the intervention on the side of the Whites by British, French, US, Japanese, Czech, and Canadian troops. But the unhumans can be defeated!

The man Posobiec and Lisec champion as their first great victor in the fight against the unhumans is Francisco Franco, the man who prevented the communist takeover of Spain in the 1930s. What they do not explain is where Benito Mussolini and Adolf Hitler fit into their historical schema. While Posobiec and Lisec chronicle the murderous brutality of the Stalin regime, they do not include either the Italian Fascists or the German Nazis in the ranks of the unhumans. They are not celebrated as heroes, but neither are their murderous regimes denounced as unhuman. The Holocaust does not seem to catch their attention. Certainly, ignoring the Nazi regime and its murderous crimes in the way that they do is something of an achievement, but presumably to discuss the Fascists and the Nazis would only be a distraction; and, of course, these people are today Trump supporters and allies against the unhuman Left.

As for Franco, 'a Great Man of History', his message during the Civil War 'translated for modern audiences was this: Make Spain Great Again'. They inevitably exaggerate the atrocities committed by the left during the conflict and seriously minimise those committed by the military rebels, who had mutinied to overthrow an elected Popular Front government. Indeed, it was the military revolt that had actually provoked a popular uprising and the only thing

that prevented the defeat of that military revolt was Italian Fascist and German Nazi intervention. This led to the Soviet Union reluctantly getting involved in the conflict and, once involved, using its power to rollback the popular revolution and to crush the revolutionary left. Stalin's overriding concern was fear of Nazi Germany and a desire to ally himself with Britain and France. His policy was driven by great power strategic concerns, and certainly not by any revolutionary commitment, something with which his regime had decisively broken.

One of the contemporary accounts they cite in support of their understanding of the Spanish Civil War is George Orwell's *Homage to Catalonia*, indeed they consider this book 'a more sobering read than 1984'. To be fair, they do seem to think he served in the International Brigade, starting out as 'pro-socialist', but after what he saw, was 'put off by all left-wingers from then onward'. Have either of them actually read the book? This is, of course, a complete travesty as far as both Orwell's actual involvement in the Spanish Civil War is concerned and his subsequent political development, but what the hell!

Another military dictator they single out for celebration is Augusto Pinochet, the hero who saved Chile from the Marxist unhumans in 1973 when he overthrew the elected Allende government. The 'globalist intelligentsia' were outraged and subsequently blackened Pinochet's reputation. He became an innocent victim of 'lawfare' and was actually arrested in Britain when he visited the country in October 1998. They even quote Margaret Thatcher speaking in defence of the great man.<sup>7</sup> One interesting omission is their failure to confront Vladimir Putin, the man who, as far as many on the right are concerned, saved Russia, and to indicate whether he stands with or against the unhumans.

There is more on the activities of the unhumans across the world, from China to Cambodia, from Nicaragua to Zimbabwe, from South Africa to Afghanistan, but let us focus on their chronicle of developments in the United States since the end of the Second World War. Inevitably Joseph McCarthy 'was right; indeed 'McCarthy terrifies the cultural Marxists, even to this very day'. They wholeheartedly endorse his fight against the unhumans, regretting his downfall and lamenting the fact that this hero is 'the most unjustly demonized individual in American history'. Since McCarthy's downfall, the unhumans have gone on to make great headway in the United States, infiltrating the country's institutions, especially Hollywood, until 'total ideological and legal capture was complete'. There is some cause for hope, however, because one of the lawyers working for McCarthy was Roy Cohn who 'would later go to spend over a

decadeworking with a young real estate developer named Donald Trump', America's future saviour.<sup>8</sup>

The decade that saw the unhumans, in the form of the Cultural Marxists, triumph in the United States, was the sixties. As they insist:

Make no mistake about it: the '60s were a revolution in every sense of the word. Millions fled cities and towns. What occurred may not have been as destructive as the French or Russian Revolutions, but this social revolution in the sixties was moved by the same spirit.

The Civil Rights movement in particular comes in for considerable criticism for the way it was used by the unhumans to foster a 'new racism', targeting white people and a process of 'resegregation', with black activists violently driving millions of white people from their homes in what was 'really state-backed ethnic cleansing'. Posobiec and Lisec actually compare the treatment of white Americans in this period with Stalin's treatment of the kulaks in the Soviet Union. All this has been covered up, and what they call the 'left-wing Civil Rights Revolution' has actually 'inverted everything into the opposite of what it was purported to be'. And in 2020, the 'George Floyd protests gave modern Americans a brief taste of the turmoil that was typical of the 1960s'. More insidious are the 'microrevolutions' that are ongoing. Obviously what the United States desperately needs is a strong man, a hero of the same stature as Franco and Pinochet. Unfortunately for them, that man is Donald Trump, a wholly incompetent, corrupt, narcissist who has already failed to overthrow US democracy once.

Posobiec and Lisec's version of the failed 6 January 2021 insurrection is that it was no such thing: it was actually an insurrection 'against Trump and his supporters'. It was a staged event intended to discredit the MAGA movement. Jack Posobiec was actually there and can personally testify that he saw 'the flashbangs thrown into a peaceful crowd' in order to create disorder. The whole thing was 'an inverse Bastille', with peaceful protesters being lured into a government building so that the incoming Biden regime could unleash a purge, locking up those trying to defend American freedom. As they put it: 'The locking up of patriots was always the goal. This is what they do.'

They end their book with a quote from that great man General Franco and a stated determination to end communist revolutions once and for all: 'We're

---

<sup>8</sup> *Unhumans*, pp. 153, 156

going to win'.<sup>9</sup> Posobiec and Lisec's *Unhumans* is a positively surreal attempt to prepare the way for an American dictatorship, the only way to defeat the communists who apparently effectively control the country already. We live in dangerous times!
